ANGLE ADAPTERS and FLUSH BASES

increase usefulness of

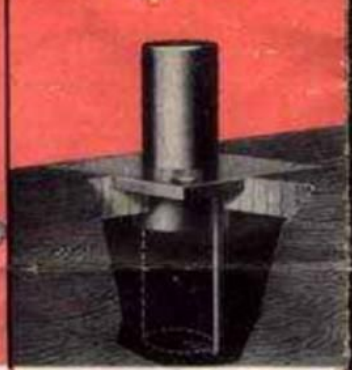
COLUMBIAN GYRO-VISES

In addition to the extra usefulness achieved by placing additional bases in separate locations, even more flexibility can be obtained by using Gyro-Vise Angle Adapters and Flush Bases.

Angle Adapter

The Columbian Gyro-Vise Angle Adapter permits movement of the vise in a vertical arc. It enables the user to put his vise in any position he could ever possibly need.

Flush Base



The Flush Base is for applications where it is desirable to keep the working surface free of obstacles. By loosening a set screw, the post can be dropped level with the surface.

COLUMBIAN

GYRO-VISE No. 73½

BEST FOR HOME and SHOP

Use it in any position! upright . . . on either side . . . at any angle

Copyright, 1956—The Columbian Vise & Mfg. Co.

"Handiest tool we've ever owned"... is verdict of enthusiastic users

3½-inch jaw width...5-inch jaw opening...

⅛ to 1½-inch pipe capacity

The Columbian Gyro-Vise is the most useful, most versatile vise ever made.

It operates around a base on which it can be turned to any required position. When not in use, the vise can be removed from this base and kept in a drawer or tool chest. Any desired number of additional bases can be placed in different parts of the home, shop or garage and the vise easily and economically moved from job to job.

Stands Upright!

Gyro-Vise turns in a complete circle in upright position. It locks automatically when jaws are tightened.

Gyro-Vise base

Lays flat on either side!

Gyro-Vise can be placed on either side on base. It can be rotated to meet every need.

HOLD PIPE... HOLD WOOD... HOLD METAL!

In the Gyro-Vise, you'll find countless useful, desirable, efficient features. Smooth, positive-grip, mar-free jaw faces hold materials securely—from paper-thin to 5-inch thicknesses. Jaws are 3½ inches wide—most efficient size for home workshop vise. They have a depth of 2⅛ inches... 7⅞ square inches of gripping area. Removable and replaceable pipe jaws have capacity of ⅛ to 1½ inches. Maximum jaw opening distance is 5 inches. Gyro-Vise is 8½ inches high... weighs 16½ lbs.

The Gyro-Vise is ideal for carpentry, sanding, sawing, tool sharpening, carving, plumbing ... a very shop operation. Also, it's perfect for the "do it yourself" handy man around the home, the woodworking hobbyist and the fellow who just likes to tinker...
